## Amending the 2015 Budget to Accept Wisconsin Trauma Project Funding

### **Executive Summary**

The Wisconsin Department of Children and Families has awarded the Human Services Department \$35,000 in Wisconsin Trauma Project funding. The goals of the Wisconsin Trauma project are to create a trauma-informed and responsive child welfare system by identifying the needs of children and families through screening and assessment; restoring well-being, stability and permanency through effective intervention; and sustaining efforts through community involvement. The intensive training program for both the mental health clinicians and care providers is based on national training curriculum with proven outcomes. The project takes 12 months to complete and is comprised of three tiers.

#### Tier 1: Trauma-Focused Cognitive Behavioral Therapy (TF-CBT) Learning

Collaborative: Tier 1 is designed for mental health clinicians. Over the course of 12 months, clinicians first learn how to administer, score and interpret a trauma screening and assessment instrument, and then learn how to use Trauma-Focused Cognitive Behavioral Therapy (TF-CBT) to treat children who have been exposed to and impacted by trauma. This is accomplished through participation in a 12-month Learning Collaborative led by a national TF-CBT trainer.

Tier 2: Parent Workshop: The second tier of the WI Trauma Project involves trauma-informed parenting training using the NCTSN's curriculum *Caring for Children Who have Experienced Trauma: A Workshop for Resource Parents*. The workshop provides parents with the knowledge and skills needed to effectively care for children who have experienced trauma. The training takes approximately 16 hours to complete and is comprised of 8 modules. Three 16-hour training workshops are completed during the course of a project year and monthly consultation calls are provided to county staff and training participants to support adoption and sustainability of new skills.

Tier 3: Trauma Informed Care for the Community: The third tier involves ongoing efforts—system-wide training, consultation, technical support and coordination—to create a trauma-informed system of care. Community-wide trauma trainings and agency-specific activities will be determined based on the agency's needs and interests.

Funds will cover the cost of the trainers, training costs (including venue and food for participants), training materials, and ongoing consultation. There is a \$10,000 match requirement for this funding that has already been included in the Department's 2015 Budget.
