EXECUTIVE SUMMARY

In the Federal Water Pollution Control Act Amendments of 1972, federal law created a process to establish locally developed area-wide water quality management plans. Area-wide water quality management planning was codified at the state-level through the development of Wisconsin Administrative Code NR121, which specifies that Area-wide water quality management plans include components that deal specifically with metropolitan sewer service areas and their projected needs for 20 years into the future.

The Wisconsin Department of Natural Resources (DNR) makes funding available to regional planning councils and county planning agencies throughout the state for sewer service area planning as it relates to ground water quality and environmentally sensitive areas.

On June 3, 2013, the Rock County Planning and Development Agency received a letter from DNR that contained an agreement to commit \$10,885 for the first year's planning for water quality in the Beloit area. The grant agreement shall commence upon its signing by both parties and continue until December 31, 2013 and grantee may claim eligible costs for reimbursement for work conducted between January 1, 2013 and the end of the grant agreement, and

The last update of the Beloit Area Sewer Service Area Plan was in 1998, and it does not serve current planning needs. Representatives from the Towns of Turtle, Beloit, and Rock, and the City of Beloit have agreed to provide representatives to a Technical Advisory Committee that will oversee the planning process.
