## EXECUTIVE SUMMARY

## Awarding Contract for Gate Openers at Southern Wisconsin Regional Airport

The four electric gate openers budgeted for replacement on the Southern Wisconsin Regional Airport were installed in 2001. The openers are starting to fail. Replacement parts are becoming harder to find and more costly.

The Airport has several newer gates that were installed as part of the Airport perimeter road project completed in 2015 that are of a different style. These newer style gates are easier to work on and parts are less expensive. Having consistency with the gates will make keeping stock parts on hand easier as well.

These gates were originally budgeted for replacement in 2017 but the airport was not able to complete the bid process and gate replacement during that budget year. Funds from 2017 were carried over to 2018. During the 2018 bid process all bids came in at more than double the 2017 carried over amount. For 2019, the airport carried over the 2018 funds and budgeted for an additional amount to cover the increase in price.
