## Executive Summary

### Awarding Contract for Replacement of the Sound System in Courtroom H

The sound system in Courtroom H is in need of replacement due to its age and failure of the current amplifiers. \$40,000 was budgeted in 2020 but the actual cost to replace the system is \$74,131.48. The additional funds needed to complete this project are available in the courthouse capital account due to a budgeted AC unit replacement that is not needed.

The Facilities Management Director spoke with the City of Janesville to receive feedback on the system they had installed at City Hall by AVI Systems Inc. out of Madison Wisconsin. AVI Systems reviewed our current system and provided a quote to replace it with a new, state of the art sound system that will integrate with County Board functions such as televised meetings and voting. This will be similar to the one installed for the City of Janesville.

AVI Systems Inc. was awarded the current state of Wisconsin contract for audio and visual equipment. The State Contract number is **#505ENT-M18-AudioVideo-01**.

- In developing a comprehensive proposal for equipment and integration services AVI Systems' Sales Representatives and Engineering teams must make some assumptions regarding the physical construction of your facility, the availability of technical infrastructure and site conditions for installation. If any of the conditions we have indicated in the site survey form are incorrect or have changed for your particular project or project site, please let your Sales representative know as soon as possible. Conditions of the site found during integration effort which are different from those documented may have an effect on the price of the system solution, integration or services. To ensure that you have an accurate proposal based on your facility and specific to the conditions of your project, please review all project documentation carefully.

### ENGINEERING SERVICES

#### ENGINEERING SERVICES TO BE PROVIDED

AVI Systems will work with the Customer and any related design professionals selected (architects, engineers, etc.) to provide initial and ongoing audiovisual systems design and engineering support for this project.

AVI Systems strongly encourages the fostering of a truly open, cooperative "design team" approach with team members bringing unique, valuable insight from their special perspective to the team.

The goal of these services is as follows:

- Understand clearly the current and future AV needs of the Customer.
- Provide accurate construction documents for implementation of the AV related infrastructure.
- Provide an overall AV plan that will allow for the procurement of appropriate AV equipment and installation, complete with system diagrams, ensuring correct integration of the equipment.
- Compile the data gathered during the engineering process into an Integration Agreement for a turnkey installation of all AV systems, with the added value of a seamless integration process.

The Design Process can be modified at any time per the direction of the Customer – otherwise it shall follow this general outline:

AV Program Review / Verification – The AVI Systems design team will obtain from the Customer operational specifications desired of the audio and video systems within the designated facility. Additional facility information will be required including the building's electrical, structural infrastructure, as well as the physical sizes of each room or space. Using compatible AutoCAD drawings, the integration of desired AV systems within available spaces will be visualized. During this initial design phase various equipment options, with an eye toward future expandability while maintaining current value, will be suggested.

RSA: 955599

**Budget Verification** – The AVI Systems design team will create a project scope compiled from the information received from the Customer. AVI Systems will generate cost estimates for the various systems as outlined above and compare these budget estimates to any initial AV budgets. This process will reaffirm the exact direction that engineering resources should target in the next phase.

**Initial Design** – During this phase, AVI Systems will begin applying the above-defined systems in detail to the various areas of the Customer facility. Further communications between the Customer and the other design team members, as various options are explored will be necessary at this time. Typical deliverables from this phase would include the following drawings and/or documents.

- Preliminary AV Floor Plan and Elevations detailing locations of all AV devices
- Preliminary Projection Geometry detailing projection/screen locations with viewing angles, mounting details, and etc.
- Preliminary AV Technical Power, Conduit Plans, and Riser Drawings
- Preliminary AV Video Flow
- Preliminary AV Audio Flow
- Preliminary AV Control Flow
- Preliminary AV Rack Layouts
- Preliminary Equipment Lists
- Preliminary Budget Estimates

Submittal of the above for the various rooms will be a progressive process, with most critical drawings being submitted first, allowing construction details to be available on an as needed basis. During this process, modifications to the preliminary plans due a variety of considerations - architectural/aesthetic considerations, budget reviews etc. Electronic exchange of AutoCAD drawings between all the "team members" will facilitate quick exchange of updates. Specific design "freeze dates" will be established with all parties to facilitate timely submittals and help manage Customer's end cost. All changes are to be reviewed and approved by all parties.

**Final Systems Design** – The changes made in the previous phase to the preliminary designs will be updated and regenerated as "final" construction documents. AVI Systems will typically work off of background drawings from an architect under contract to the Customer, entering AV specific data and returning these back to the architect (or other Customer retained design professional) for integration into final construction documents.

**Project Specifications Document** – The final audiovisual systems designs will be compiled into a written project technical specifications document with equipment lists and any pricing not already included in the quote for a complete integration. This document will include the following system diagrams and documents.

- AV Floor Plan and Elevations detailing locations of AV devices
- AV Video Flow
- AV Audio Flow
- AV Control Flow
- Equipment lists as specified
- System infrastructure requirements including cable and termination specifications
- System operational and post operational requirements
- Project Scope of Work
- Project costs
- Project Integration Agreement

**22. Price Quotations** – Unless otherwise specified, all prices quoted reflect a discount for a cash payment (i.e., check, wire transfer) made by Customer in full within the terms of each invoice. Payment in other forms, including credit card, p-card, or other non-cash payments shall be subject to a convenience above the cash price. Please speak to your AVI representative if you have any questions in this regard.
