

Public Involvement Notice

Improvements to CTH J at Turtle Creek

Planned improvements for CTH J in the Town of Turtle, Rock County, are scheduled to be discussed in a short video presentation available for viewing on the Rock County website, or a copy of the video can be obtained from the individuals below. Materials will be available beginning Wednesday, September 23, 2020.

The CTH J project involves improvements to the roadway and bridge at the crossing of Turtle Creek just north of the intersection with Shopiere Road. The proposed improvement will include the removal of the existing bridge and construction of a new multi-span concrete bridge. The 475-foot long project will include replacement of the bridge at the existing location and approximately 325 feet of roadway approaches.

During construction of the project, the bridge will be closed to traffic. Construction is anticipated to take approximately 2 ½ months during 2022. The earliest construction may begin is June 16th due to in-stream work restrictions. The exact timeframe will be determined by the contractor based on their availability.

Small temporary limited easements (TLEs) from private properties may be needed on the south side of the bridge to grade out the side slopes, but no permanent right of way acquisition is anticipated.

Individuals are encouraged to contribute comments about the bridge project by Wednesday, October 7, 2020 by contacting the following individuals:
