Executive Summary

The Rock County 911 Communications Center has utilized the existing Computer-aided Dispatch (CAD) software since 2001. Since that time, many things have evolved within the 911 industry (both technically and procedurally) which require upgrades to the existing dispatch hardware and software products.

Motorola has developed improved CAD software that builds on the fundamentals of the Communications Center's existing software. The new software will enhance communications with police, fire and EMS mobile vehicles, improve mapping capabilities, allow for better reporting, and prepare Rock County for next generation 911 functionality.

Motorola has provided excellent and timely support for our existing dispatching software and provides similar software to many highly recognized public safety communication centers within the United States.

Motorola has specified and certified the hardware to use with their system.

CDW-G holds the Western States Contract Alliance Computer Contract number #WSCA/NASPO-15-20400-905, which covers the specified hardware.

This resolution authorizes Rock County to purchase the specified hardware from CDW-G at a cost not to exceed \$109,500.
