### **Summary**

While the American food supply is among the safest in the world, the Federal government estimates that there are about 48 million cases of foodborne illness annually—the equivalent of sickening 1 in 6 Americans each year. And each year these illnesses result in an estimated 128,000 hospitalizations and 3,000 deaths. The Rock County Public Health Department regulates and inspects approximately 850 food establishments annually in order to reduce the potential for food-borne illnesses in our community. Federal Voluntary Retail Food Program standards have been developed to ensure that facilities are properly inspected and inspections meet goals and objectives of the nine federal standards. Rock County will be utilizing this training grant to provide local, regional, and national food safety training opportunities to our staff to assist in meeting the voluntary federal standards established by the FDA and to provide food establishment owners, operators, and workers with the latest information on food safety practices.
