- 2009 COMBS #16201 FD ALUM @ S 1/4 COR SEC 31 & @ NE COR SEC 6 MAGNOLIA TWP. N89-48-05E 2384.03 TO NE COR SEC 6. THENCE SO-45-52E 32.64 TO PROPERTY COR.

@ NE COR SEC 6 FD ALUM 0.3' DEEP, 1.3' NORTH OF CENTER OF PVMT., & REFERENCE PIPES. USED MY OLD OBSERVATIONS TO COMPUTE THE POSITION OF THE SE COR SEC 31.

C) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

ACCEPTED ALUM. @ NE COR SEC 6 & CUT LIMESTONE @ SE COR SEC 31.

D) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (a), above.

THERE IS A 4.42' DISCREPANCY BETWEEN HARRISON & LOCKE'S DISTANCES OF 246.18' AND THE DISTANCES FROM THE 1890s TO PRESENT. I BELIEVE THIS IS BECAUSE LOCKE FD THE ORIGINAL STAKES AND BEARING TREES AT THE NW COR SEC 5 & THE SE COR SEC 31, WHERE AS RUGER IN 1870 DID NOT FIND THE STAKE AT THE SE COR SEC 31. INSTEAD HE ESTABLISHED THE SE COR OF SEC 31 FROM STUMPS OF THE BEARING TREES. THIS POSITION WAS PROBABLY CLOSE BUT NOT EXACT.

(E) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning the corner location. NO

I, **Donald Barnes**, hereby certify that the corner location as identified by the corner code index was determined by me under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.
