NOTE IN INK: TAKEN OUT BY COUNTY HWY DEP AS OF 1-1-74. PAGE HAS ALL REFERENCE PIPES AS SHOWN IN VOL 4 PG 440. DISTANCE TO NORTH REFERENCE PIPE IS 28.24 AND THE DISTANCE TO THE FIRST NORTHERN REFERENCE PIPE ON LINE WITH OTHER 2 NORTHERN REFERENCE PIPES IS 40.00 AND NOT 50.00 AS SHOWN IN RECORDS. THE BELOIT RECORD SHOWS A PIPE THAT IS 28.24 NORTH OF THE SECTION CORNER. [THE 28.24 DISTANCE IS SHOWN ON COMBS L-17 AS 28.17. I BELIEVE HE FD THE PIPE AND HIS STATEMENT THE 50' DIMENSION WAS IN ERROR IS INCORRECT BECAUSE THE PIPE WAS NOT SHOWN ON THE JANESVILLE RECORD.]

I BELIEVE THE 50 FOOT DIMENSION SHOWN TO THE 1ST REFERENCE MONUMENT ON COUNTY SURVEYOR RECORD VOL 4 PG 440 TO BE WRONG. REFERENCED SAME FD NW,N, & SE REFERENCE PIPES.

FD R/R SPIKE COMBS SET IN 2009 & REFERENCE MONUMENTS. THE 1970 BATTERMAN DISTANCE OF 28.24 TO THE NORTHERN PIPE IS SHOWN ONLY IN THE BELOIT RECORDS. FB #152 PG 38 DATED 7/10/70 CALLS FOR 28.24. THE FIELD BOOK CALLS FOR 40.00 AND NOT 50.00 AS IN RECORDS. I FOUND ALL 3 REFERENCE PIPES. THE AREA NEAR THE R/W PIPE & BATTERMANS REFERENCE PIPE APPEARS TO BE DISTURBED BY THE INSTALLATION OF THE TELEPHONE PED. COMBS CALLS FOR THE DISTANCE FROM SCHORDER'S LOT PIPE TO THIS LOT PIPE ON THE R/W LINE TO BE SHORT BY 0.32'. THIS SUPPORTS THE DISTURBANCE OF THE 2 PIPES NEAR THE PED. THE FOUND PIPE N3-22-48W 28.17 OF THE CUT LS WAS DISTURBED SINCE I FOUND IT IN THE FALL OF 2011.

DUG & FD CUT LS 1'3" BELOW PVMT SURFACE. SET ALUM RISERS ON TOP OF LS. PLACED 2 MAGNETS ON TOP OF L.S. NEAR PVMT CENTER & ON LINE WITH N/S FENCE.

C) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

ACCEPTED POSITION OF THE CUT LIMESTONE.

D) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (a), above.

DISCREPANCY IS SHOWN IN DRAWING. THE CUT LS IS S18-40-09W 0.12' FROM THE FD R/R SPIKE.

(E) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning the corner location.

I, **Donald Barnes**, hereby certify that the corner location as identified by the corner code index was determined by me under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.
