AN ERROR WAS DISCOVERED IN THE ADJUSTMENT DATA BASE. THE NUMBERS FOR THE N ¼ COR SEC 4 AND THE S ¼ COR SEC 33 WERE REVERSED. THE APPROPRIATE CHANGES WERE MADE AND THE REMONUMENTATION MAPS CORRECTED.

C) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

IN PREVIOUS REMONUMENTATION PROJECTS I ACCEPTED THE N ¼ COR AS ESTABLISHED BY BATTERMAN IN 1970. HOWEVER, SINCE MAKING THE CHANGES AND REEVALUATING THE INFORMATION I BELIEVE THE CORNER IS QUESTIONABLE FOR THE FOLLOWING REASONS:

- 1) BATTERMAN NEVER STATED WHY HE PLACED THE N ¼ COR 8.25' WEST OF THE S ¼ COR SEC 33.
- 2) A POINT MIDWAY BETWEEN THE NW AND NE CORNERS OF SEC 4 IS 1.70' WEST OF THE S ¼ COR SEC 33 WHICH IS IN HARMONY WITH RUGER'S 1.98' DISTANCE.

D) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (a), above.

THERE IS A DISCREPANCY BETWEEN THE JOG DISTANCE AS IS AND RUGER'S DISTANCE. ALSO POSITION AS MONUMENTED IS NOT MID WAY BETWEEN THE NE AND NW CORNERS OF SEC 4 AS CALLED FOR BY THE FEDERAL MANUAL.

(E) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning the corner location.

I, **Donald Barnes**, hereby certify that the corner location as identified by the corner code index was determined by me under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.
