

This is a record and plat of a survey made by me Dec. 11-12-1973, of that portion of a highway in the town of Bradford, the center line of which is the north & south quarter line of Section 32. The survey was made to ascertain the location of the fences with reference to the East and west line of the highway. The black dash line indicates the quarter line and the center line of the highway so far as the highway follows

The quarter line - the numerous black lines indicate the East and west lines of the highway. The red lines indicate the East and west fences and stone wall - Edward Rogers County Surveyor
