CORNER MONUMENT

O WITNESS MONUMENT

FOUND CAST IRON MONUMENT

PEADINGS AND BASED ON :

FIELD BOOK / PAGE # 59

SHOW A PLAN VIEW DRAWING DEPICTING THE CORNER MONUMENT AND SURROUNDING PHYSICAL FEATURES, INCLUDING THE EXCAVATION AREA AND DEPTH. THE CORNER MONUMENT SHALL HAVE THE FOLLOWING CHARACTERISTICS: 1) HAVE AT LEAST TWO PREDETERMINED BREAK-OFF POINTS. 2) IF BROKEN, LEAVE A PERMANENTLY MAGNETIZED REMNANT AT THE ORIGINAL POINT. 3) MUST BE EXTENDABLE. 4) THE CAP IS INSCRIBED: ROCK COUNTY SURVEY MONUMENT - PENALTY FOR DISTURBING MARKER. 5) OR AN EXISTING CUT LIMESTONE. AN IRON PIPE 1/2" x 4'0" (MINIMUM) MAY BE USED IN AREAS WHERE GHOUND WATER IS WITHIN ONE FOOT OF THE SURFACE. IF THE CORNER IS OCCUPIED BY AN IMPROVEMENT (MANHOLE, BURIED CABLE, ETC.) ANY DURABLE, DISTINCT MONUMENT MAY BE USED. CORNERS SHALL BE REFERENCED WITH AT LEAST 4 DURABLE WITNESS MONUMENTS. WITNESS MONUMENTS SHALL BE MADE OF CONCRETE, NATURAL STONE, IRON OR OTHER EQUALLY DURABLE MATERIAL, EXCEPT WOOD. DESCRIBE THE CORNER AND THE WITNESS MONUMENTS.

CORNER CODE:

Describe any record evidence your Considered, and whether the somment was found or pisced any other material evidence your Considered, and whether the somment was found or pisced (just any other material evidence your Considered, and whether the somment was found or pisced (just any other material evidence your Considered, and whether the corner as researed or country that the corner as researed or the corner and of the corner and or the corner as researed or the corner and or the corner as previously restored or restablished somewas shown on the drawing in (a), above. 1. **Describe any material discrepancy between the corner as previously restored or restablished somewas the drawing under (a), above. 2. **Describe any material discrepancy on the pian view drawing under (a), above the distance solved in the drawing under (a), above. 2. **Describe any material discrepancy on the pian view drawing under (a), above the drawing under (a), above the corner restablished and (a), above the corner restablished and (a), above the corner restablished and (a), above the corner corner incation. 2. **Learnified by the corner code undex were, in a field survey or the corner location. 3. **Learnified by the corner code undex were, in a field survey or the corner proportion of the corner proportion of the corner code undex were, in a field survey or the corner proportion of the corner proportion of the corner code undex were, in a field survey or the corner proportion of the corner code undex were, in a field survey or the corner proportion of the corner proportion of the corner code undex were, in a field survey or the corner code undex were, in a field survey or the corner code undex were, in a field survey or the corner code undex were, in a field survey or the corner code undex were, in a field survey or the corner code undex were, in a field survey or the co	.=			
Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location? (1) Describe any material discrepancy between the location of the corner as restored or restablished and the location of that corner as previously restored or restablished and the location of that corner as previously restored or restablished and (1) the corner as restored or restablished and (1) the corner as restored or restablished and (1) the corner as restored or restablished, and (2) to at least 4 of the vitness monuments above on the drawing in (8), above. 1. Was the corner restablished through lost corner proportionate methods? If so, whose the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in detarbining the corner location. 2. Was the corner restablished through lost corner proportionate methods? If so, whose the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in detarbining the corner location. 3. Describe any material discrepancy between the location of the vitness as identified by the corner code index tere, in a field survey on the corner code index tere, in a field survey on the corner code index tere, in a field survey on the corner includes the corner proportion of the corner includes the corner includes the corner includes the corner includes the corner proportion of the corner includes the corner proportion of the corner includes the corner inc	C	hescribe any record evidence monument	evidence occupational evidence, testimonial evidence or	
(a) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished above. Show the distances between the corner as previously restored or reestablished as a previously restored or reestablished as a constant and the drawing of (a), above. 1. A location of the drawing in (a), above. 2. In a location of the drawing in (b), above. 3. In a location of the drawing in determining the corner location. 3. In a location of the directions and distances to other public land survey curriers used as evidence or used for proportioning in determining the corner location. 4. In a location of the directions and distances to other public land survey curriers used as as identified by the corner code index were, in a field survey on Auc 30 1797 established, re-established, monumented, re-monumenter recovered or restored as expressed below and in conformance with the regulations and rules as required in the current manual of survey instructions of the United States Department of Interior, Bureau of Land Management. 3. COUNTY SURVEYOR FILING DATA Date of Computer Entry Date Microfilmed Treasurer's Receipt No.	í	any other material evidence you consider	ed, and whether the monument was found or placed.	
(a) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished above. Show the distances between the corner as previously restored or reestablished as a previously restored or reestablished as a constant and the drawing of (a), above. 1. A location of the drawing in (a), above. 2. In a location of the drawing in (b), above. 3. In a location of the drawing in determining the corner location. 3. In a location of the directions and distances to other public land survey curriers used as evidence or used for proportioning in determining the corner location. 4. In a location of the directions and distances to other public land survey curriers used as as identified by the corner code index were, in a field survey on Auc 30 1797 established, re-established, monumented, re-monumenter recovered or restored as expressed below and in conformance with the regulations and rules as required in the current manual of survey instructions of the United States Department of Interior, Bureau of Land Management. 3.
