### **Executive Summary**

Immunizations, also called vaccinations, are one of the greatest achievements in public health. Vaccines prevent disease in people who receive them. Additionally, if enough people in the community are vaccinated, the entire community can be protected because there is little opportunity for an outbreak to occur.

Before vaccines, many died from diseases like measles, pertussis (whooping cough), and *Haemophilus influenzae*. Through the introduction of routine vaccinations, these and other vaccine-preventable diseases occur much less often in the United States. However, the viruses and bacteria that cause these diseases still exist. Vaccinations are the best way to prevent these diseases and the serious effects they can cause.

Adults, as compared to children, are vastly under-immunized. Vaccination coverage rates among Wisconsin adults have remained consistently low for many years. The rate of influenza vaccination among persons aged  $\geq 18$  years during the 2012-2013 influenza season was 36.5%. Furthermore, only 40.5% of adults aged  $\geq 18$  years have received a tetanus, diphtheria, and acellular pertussis (Tdap) vaccine and 31.1% of persons aged 18-64 years with a high risk condition have received pneumococcal vaccination. This grant will serve to improve adult immunization rates in Rock County.

### **Executive Summary**

Asthma is a chronic lung condition that affects 15 percent of adults and 10 percent of children in Wisconsin. The burden of asthma in Wisconsin is not equally shared, with certain minority groups, age groups and geographic regions disproportionately affected. Rock County has had consistently high asthma emergency department visit and asthma hospitalization rates over the past decade. Too many people with asthma in Wisconsin struggle to thrive at work or school and are subject to reduced quality of life because their asthma remains poorly controlled. A variety of factors are known to trigger asthma episodes (attacks), including allergens (e.g., pollen, dust mites and mold), viral infections, irritants (e.g., chemicals, tobacco smoke and air pollution) and other factors, such as exercise, cold air and stress. This complex, multi-faceted condition requires a comprehensive approach to effective management at both the individual and population levels. Comprehensive asthma care includes a seamless alignment of the full array of services across the public health and health care continuum. The National Asthma Education and Prevention Program Expert Panel Report outlines four components of care including routine health care visits, pharmacological treatment to effectively manage and control symptoms, patient education, and an environment that minimizes exposure to asthma triggers. This grant will serve to improve asthma rates in Rock County.

### **Executive Summary**

The Rock County Public Health Department has received funds from the South Central Healthcare Coalition micro-grant program to obtain equipment and supplies to aid in emergency preparedness efforts.

We plan to utilize these funds to purchase a Microsoft Surface Pro 4 tablet with accessories, first aid kits, and emergency kits and supplies, vaccination promotional materials, and background checks for current Wisconsin Emergency Assistance Volunteer Registry (WEAVR) members in Rock County.

Our goal is to be more mobile by purchasing a technology device that will allow the emergency preparedness coordinator the ability to go out into the field and connect to Wi-Fi, share information and resources with partners, request volunteers through the on-line WEAVR system, and enhance our media capabilities at meetings, exercises, conferences and real events. This tablet will streamline our preparedness processes.

These funds will equip the Public Health Department with advancing technology for local public preparedness initiatives and activities and will promote sustainability as we will be able to use technology in a variety of platforms, provide educational emergency preparedness tools to clients, provide another layer of security to volunteer management and have our emergency preparedness supplies secured and readily available.

## **Executive Summary**

The Rock County Comprehensive Community Services (CCS) program serves children, adults and the elderly, providing psychosocial rehabilitation services to individuals with mental illness and/or substance abuse disorders.

The program, which has been operating since August 2014, is at capacity and is will be unable to accept new clients in the very near future.

Currently, there are 8 CCS positions available to carry caseloads. New applications are coming in steadily week by week and, per administrative code, once we receive an application, we have 30 days to complete a comprehensive assessment.

CCS is a Medicaid entitlement program and, because Rock County is delivering CCS services as part of a regional model, we are able to recover all of our costs, direct and indirect, from Medicaid. This prevents us from needing to use tax levy to administer this program.

Because CCS is an entitlement program and is fully funded by Medicaid, we are not permitted to have a waiting list for this program and must be able to admit eligible consumers as they apply. Despite our attempts to gradually admit clients over time, we were issued a citation from the state in 2015 for not readily admitting clients per administrative code requirements. In response we submitted a plan of correction assuring that we would be able to admit consumers as they apply. We are currently at risk of being out of compliance again with this requirement if we delay admissions of eligible clients.

The Human Services Department requests the County Board approve the resolution. Upon approval the Department will hire two CCS Case Managers as soon as possible and purchase the office equipment and PCs to support the positions. In addition, the Department will hire a Peer Specialist. The Peer Specialist is a newly created position. The successful candidate will be called in as needed for work and classified as a Pool position. Pool staff do not work a regular schedule, do not qualify for benefits, precluded from working more than 25 hours per week, and paid out of a seasonal salary account.

Because the program is fully covered by Medicaid, the cost of the additional staff would be covered by revenue.
