FD PK TIES 0.1' DEEP. SET MAG. NAIL 2.00' SOUTH AND WEST OF FD PKs. TOWNSHIP NETWORK ADJUSTMENT INDICATES THE FD NORTH PK IS THE 1/4 COR AND THE EASTERN PK IS THE 3.00' REFERENCE TIE. THE REPORTED 2.00' DISTANCES FROM PKs IS INCORRECT. THE ORIGINAL FIELD BOOK DISTANCES OF 3.00' ARE CORRECT. THIS WAS CONFIRMED BY FINDING A METAL SOUND 3.0X' TO THE NE OF COR. FD ERROR IN REDUCTION OF SLOPE TO HORIZONTAL IN OLD NOTES.

C) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

ACCEPTED FOUND PERPETUATED LOCATION.

D) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (a), above.

IN 1986, BATTERMAN USED THE PK AT THE CORNER AS ONE OF THE REFERENCE PKs & USED THE POSITION AS MONUMENTED BY THE MAG. NAIL AS THE 1/4 COR.

(E) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning the corner location. NA

I, Donald Barnes, hereby certify that the corner location as identified by the corner code index was determined by me under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.
