(b.) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

THE PRORATED DISTANCE IS IN THE RIVER. I DID VERY LITTLE FIELD SEARCH FOR THE CORNER. IT IS VERY UNLIKELY THAT THE 1833 WOOD POST SURVEVED THE LAWN PLACEMENTS AND THE RIVER.

(c.) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

NO

(d) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (o), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (c), above.

NA

(e) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location.
