FU528

I FD A PIPE NEAR INTERSECTION OF THE FENCE LINES. I ALSO FD SANDSNES 1978 CONTROL POINT #3340. IT IS A BOLT 0.10' BELOW THE SURFACE OF RD PVMT.

C) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

THE COMPUTED DISTANCE BETWEEN THE FD BOLT AND THE FD PIPE AT THE S 1/4 COR SEC 3 IS 286.92'. SANDSNES'S MAP CALLS FOR A DIRECT MEASUREMENT OF 287.20'. THE DIFFERENCE IS 0.28'.

THIS LARGE DIFFERENCE MAY BE THE RESULT OF REDUCING THE 1978 SLOPE DISTANCE TO HORIZONTAL. THE VERTICAL DIFFERENCE OF THE TWO POINTS IS ABOUT 38'. REDUCTION OF THIS SHORT SLOPE TO HORIZONTAL DISTANCE IN SUCH A LARGE VERTICAL DIFFERENCE WILL RESULT IN A HORIZONTAL ERROR OF 0.26' FOR A 2' ERROR IN VERTICAL HEIGHT DIFFERENCE AND A HORIZONTAL ERROR OF 0.38' FOR A 3' ERROR IN VERTICAL HEIGHT DIFFERENCE.

I ACCEPTED THE FOUND PIPE. IT IS IN HARMONY WITH RECORD DISTANCES TO OTHER FD MONUMENTS.

D) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (a), above.

(E) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning the corner location.

I, **Donald Barnes**, hereby certify that the corner location as identified by the corner code index was determined by me under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.
