2004 COMBS CSM VOL 28 PG 154 FD ALUM. 2483.14 TO DISK IN CONC. @ N 1/4 COR SEC 21.

FD ALUM. MON.

C) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

ACCEPTED FD ALUM.

D) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (a), above.

IT WAS IMPOSSIBLE FOR HARRISON IN APR. 1834 TO RUN THE WEST LINE OF SEC 21 FROM THE SW COR OF SEC 21 BECAUSE BURNHAM ESTABLISHED THE SW COR OF SEC 21 TWO YEARS LATER IN JULY 1836.

(E) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning the corner location.

I, **Donald Barnes**, hereby certify that the corner location as identified by the corner code index was determined by me under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.

Seal  
Donald
