- C) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location? $N \square$
- D) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (a), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 4 of the witness monuments shown on the drawing in (a), above.

 NDNE
- (E) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning the corner location.

YES. I PRORATED THE DISTANCE FROM THE SE CORNER OF SEC 19 TO THE FD LIMESTONE AT THE MEANDER CORNER ON THE WEST SIDE OF THE RIVER. I USED BURNHAM'S 1836 DISTANCE OF 4280.10 AND MY DISTANCE OF 4325.91. THE 1/4 CORNER IS ON A LINE BETWEEN THESE CORNERS. MY DISTANCE TO THE SE CORNER IS 2668.27 AND THE DISTANCE TO THE MEANDER CORNER IS 2459.78

I, **Donald Barnes**, hereby certify that the corner location as identified by the corner code index was determined by me under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.
