

Of a Survey on Section..... T..... R..... E. of the 4 P. M. in..... Township
Rock County, Wisconsin, made..... the.....

I hereby certify that the following is a correct record of said survey as made by me.

**COUNTY BUILDING
CITY OF JANESVILLE**

County Surveyor.

Standard HARRISON's

The Standard Harrison comes in the largest variety of sizes to meet the widest possible range of needs. Tall, short, straight, flared.

Every other type of marker: wood posts, stone, steel bars or pipes, concrete, aluminum, has its problems. The Harrison, made of the proven metal — cast iron — was designed to solve those problems, especially in consideration of the Surveyor's problems to perpetuate original government corners.

Flared models are available at 20", 30", 36", 40".
Straight models at 5", 10", 16", 20", 30", 36", 40".

The Extendible Harrison is for the permanent, flush, and visible marking of key points.

Flared models are available at 20½", 30½", 36½", 40½".
Straight models at 5½", 10½", 16½", 20½", 30½", 36½", 40½".

Extendible HARRISON's

Add-on units

The Extendible need not be dug up or replaced; the ½" top is quickly removed with the Easy-off wrench and spacers and/or legend tops added to fit. No pavement destroyed; no resurveying necessary. Spacers and legend tops are available at 1", 5", 10", 16".

Easy-off wrenches

The Harrison Easy-off wrench is designed for the Extendible Harrison's. Available in two styles: Surface wrench and 2" reach wrench. Makes adding on easy!
