Executive Summary

The County will be actively recruiting to fill a vacant Programmer / Analyst II position within the Information Technology Department. Prior to beginning the recruitment process we are requesting to re-title the position to Data Solutions Architect.

This new title of Data Solutions Architect aligns with the needs of both the I.T. Department and the County as a whole when it comes to improving the ability to leverage data across the enterprise. This position will expand the skill sets available on the Data Services team and the function and duties of the Data Solutions Architect will strictly adhere to Information Technology Infrastructure Library (ITIL) principles with an emphasis on delivering high quality data solutions to the organization. The pay range would not change and remain at Range 26.
