Invitation to Resilience Meeting for the Upper and Lower Rock Watersheds on January, 22nd, 2014

As you are aware, the Federal Emergency Management Agency (FEMA) recently updated your Flood Insurance Rate Maps (FIRMs) and Flood Insurance Study (FIS) report under the Risk Mapping, Assessment, and Planning (Risk MAP) program. Risk MAP is a FEMA program that helps communities identify, assess, and reduce their flood risk. By combining quality engineering with updated flood hazard data, FEMA provides accurate and easy-to-use information to enhance local mitigation plans, improve community outreach, and increase local awareness to flood hazards. As part of the mapping effort additional flood risk products have been developed. This new information is in the form of what we call Non-Regulatory Flood Risk Products (please click this link for more information) such as Changes Since Last FIRM (CSLF), Depth Grids for five return periods and two different percent chances, and refined HAZUS analysis. The regulatory FIRM panels, which were the focus of the Open Houses, will not be discussed during this meeting.

We would like to invite you to attend the Resilience Meeting for the Upper and Lower Rock Watersheds on Wednesday, January 22nd, 2014. The objective for this meeting is to provide you with information that will help you to utilize this updated flood risk information and build local capacity for implementing priority mitigation activities within the affected study area. The meeting will be conducted by the Wisconsin Department of Natural Resources and Wisconsin Emergency Management, cooperating partners with FEMA. We encourage all communities to participate during the meeting and would like to invite you to share your community's own best practices that demonstrate successful flood hazard mitigation.

The Resilience Meeting will also be an opportunity to discuss your community's communication and outreach plans, both for internal communication and outreach efforts to your residents. Local education about flood risk, and risks from other hazards, is an essential part of building community resilience.

Please feel free to pass this invitation along to other community officials who would benefit from this meeting. The meeting is particularly important for each community's planning department, emergency management department, director of public works, building inspector/code enforcement officer, floodplain administrator, and communications specialist.

Agenda items for the meeting will include:

- Understanding flood risk, including an explanation of the flood risk products produced by FEMA
- Strategies to reduce flood risk, including mitigation assessment and planning
- Resources to facilitate mitigation
- Communication roles and responsibilities

There are two meetings scheduled for January 22nd, 2014. The morning meeting will be focused on the Lower Rock Watershed. The afternoon meeting will be focused on the Upper Rock Watershed. The two meetings will be very similar, so if your community is within both watersheds, please attend the meeting which is most convenient:

Lower Rock Watershed Resilience Meeting 9:00am – 11:30am

Dwight Foster Public Library FCCU Community Room 209 Merchants Avenue Fort Atkinson, WI 53538

Upper Rock Watershed Resilience Meeting 2:00pm – 4:30pm

Oconomowoc Public Library
Hiram Lyke Room
200 West South Street
Oconomowoc, WI 53066

Our goal for this meeting is to create a comprehensive picture of your community's flood risk. Although Risk MAP focuses primarily on floods, the tools and information we share can provide a framework for planning for, and addressing, other natural hazards that your community may face. There are many strategies you can use to reduce your flood risk, and there are a wide variety of resources that are available from the State, Federal agencies, and associations to help you take action to reduce your flood risk. Communicating flood risk to those who live and work in your community will help them make informed decisions to reduce their risks. By taking action to reduce your flood risk, the individuals, property and businesses within your community will be more resilient to flooding. As you know, it is more expensive to react and respond to a hazard after it occurs than it is to take action to reduce the effects of hazards before they occur.

The FEMA non-regulatory flood risk products will be showcased at the Resilience Meeting. If you would like to receive a copy of the flood risk products, please bring an external hard drive or flash drive that is capable of storing at least 3.5gb of zipped data (6.5gb for both watersheds). Please note that once you unzip the data at your office the data will be up to 170gb for one watershed, or 270gb for both. When signing in, please drop off your storage device and WDNR staff will copy over the data for you during the meeting, or mail it back to you at a later date.

Please RSVP with your full name and community to kristy.hanselman@wisconsin.gov. You may also email any questions or requests for additional information to Kristy Hanselman at kristy.hanselman@wisconsin.gov. In addition, if you are interested in presenting your community's best practices as it relates to flood hazard mitigation, please contact Fritz Statz by email at gordon.statz@wisconsin.gov. We look forward to meeting with you at the upcoming Resilience Meeting.

Sincerely,

Kristy Hanselman and G. Fritz Statz Upper Rock and Lower Rock Watershed Project Managers Wisconsin Department of Natural Resources

Note: Your community's CEO and Floodplain Administrator will receive a hard copy of this letter in the mail.
